CURRICULUM VITAE

Ayman Baklouti

AI Automation · Business Process Automation · Business IT

Address: Reutlingen, Germany
Email: bkloutiaymen@gmail.com

PROFILE

Business IT student and working student in AI automation, combining hands-on AI and automation development with nine years of business experience in international retail and digital marketing. Builds end-to-end solutions with n8n, Microsoft Power Platform, Python, LLMs and RAG that remove manual work in recruiting, contracts, document handling and sales.

Career changer by conviction: after computer science in high school and at university in Tunisia, moved to Dubai, worked in digital marketing and grew from Supervisor to Assistant Store Manager at Hugo Boss. Returned to university out of passion for technology and sharpened engineering skills at 42 Heilbronn in team projects and hackathons. Strong in business analysis: spots process issues, turns them into requirements and delivers working solutions.

PROFESSIONAL EXPERIENCE

06/2026 – present — **Working Student, IT Management & AI Automation** | MN Unternehmensberatung, Tübingen

- Design and build AI-powered automations for internal processes and client projects of a consulting firm
- Automate the intake and handling of client documents (invoices, bank statements, receipts) and their filing in document management
- Build workflows and apps with Microsoft Power Platform (Power Automate, Power Apps, SharePoint) and REST API integrations
- Develop AI assistants based on LLMs and RAG using company knowledge; contribute to architecture and SaaS platform design

03/2017 – 12/2023 — **Hugo Boss** | Dubai, United Arab Emirates

Assistant Store Manager (03/2020 – 12/2023) · Supervisor (03/2017 – 02/2020)

- Joined during the brand's regional expansion; supported new store openings and building its market footprint in the UAE
- Promoted to Assistant Store Manager in 2020; co-managed daily store operations, staff planning and team leadership
- Analyzed sales, stock and conversion KPIs in SAP-supported processes to steer assortment, staffing and sales actions
- Gained first-hand insight into overstock and markdown issues in fashion retail, later the topic of the bachelor thesis

11/2014 – 02/2017 — **Marketing Specialist** | Datasparkles, Dubai, United Arab Emirates

- Planned and ran social media marketing campaigns for clients
- Performed SEO to increase organic visibility and website traffic; tracked and reported campaign results

EDUCATION

01/2024 – 12/2026 — **B.Sc. Business IT (expected 12/2026)** | IU International University of Applied Sciences

- Focus: Business Information Systems, Digital Transformation, IT Management, Databases, Programming, Process Optimization
- Bachelor thesis: "AI-Based Demand Forecasting as a Lever Against Overstock and Markdown Losses in Mid-Sized Fashion Retail"

05/2025 – 05/2026 — **Software Engineering Program** | 42 Heilbronn

- Took part in numerous hackathons, building solutions in changing teams under time pressure
- Peer-to-peer, project-based learning: C programming, algorithms, problem solving, Git and Linux

09/2012 – 07/2014 — **Studies in Applied Computer Science for Management** | FSEG Nabeul, Tunisia

Informatique appliquée à la gestion; not completed, moved to Dubai to start working

06/2012 — **Baccalaureate, Computer Science** | Lycée PAULE, Nabeul, Tunisia

SELECTED PROJECTS

2026 **AI Demand Forecasting MVP for Fashion Retail** | Bachelor thesis, IU
Python, pandas, scikit-learn, XGBoost, Streamlit

- Built an MVP that forecasts product demand for mid-sized fashion retailers (approx. 10–200 stores) to reduce overstock and markdown losses
- **Data import:** upload of historical sales and stock data (CSV/Excel) with automatic cleaning and validation
- **Forecasting:** machine-learning forecasts per product and store using seasonality, trends and promotions, benchmarked against a naive baseline
- **Decision support:** overstock and stock-out alerts, reorder suggestions and markdown recommendations
- **Dashboard:** KPIs such as forecast accuracy, stock coverage and sell-through rate
- Grounded in research on why AI pilots fail to scale, incl. expert interviews with practitioners from international fashion retailers

2025 **AI-Supported Recruiting Workflow (HR Automation)** | n8n, LLM, email integration

- Built an n8n workflow that captures applications from email and other recruiting channels automatically
- LLM step extracts key data from the CV (skills, experience, education), matches it against the job requirements and sends HR a short candidate summary
- One-click approval by HR triggers a next-step email to the candidate and forwards the resume to the hiring manager
- Hiring manager approval triggers automatic interview scheduling; replaces manual email handling with a transparent, end-to-end pipeline

2026 **AI Sales Development Representative (AI SDR)** | two-person team
Python, FastAPI, LLMs, RAG, vector database, Alembic, pytest, Docker, n8n

- Developing an AI platform for SMEs that qualifies leads and generates and sends personalized B2B outreach emails
- RAG pipeline gives the AI access to company-specific documents and knowledge bases
- Layered FastAPI backend (API, services, repositories), database migrations, automated tests, deployment via docker-compose
- Multi-tenant SaaS architecture with separated data per client

Digital Contract Automation | consulting firm
Power Automate, Power Apps, SharePoint, Lexware Office, APIs

- End-to-end contract lifecycle: generation from SharePoint data and templates, review in a Power Apps interface, e-signature with status tracking
- Customer data synchronized between Lexware Office and Microsoft 365; signed contracts filed automatically in a new customer folder

2026 **DocFlow – Automated Client Document Intake & Routing** | IU
Python, FastAPI, SQLAlchemy, OCR, Jinja2, Bootstrap, pytest

- Clients upload documents via a personal link; OCR detects document type and target folder and files them into the right client record

SKILLS

AI & LLM	LLMs, RAG, prompt engineering, AI agents, vector databases, Claude Code
Automation	n8n, Power Automate, Power Apps, REST APIs, webhooks
Programming	Python (FastAPI, pandas, scikit-learn, pytest), C, SQL (basic)
Tools & DevOps	Docker, Git, Linux, Jira (agile)
Business Systems	Microsoft 365 (SharePoint, Teams, Excel), SAP (retail), Lexware Office
Business	Business process analysis, requirements engineering, KPI analysis, retail operations, SEO & social media marketing
Languages	Arabic (native) · English (fluent) · French (fluent) · German (B1, improving)

Reutlingen, 28 October 2026
